What aspects of the course were most useful for your learning?									
How open-minded the TA was whenever our group asked a question and how casual he was in his demeanor									
His labs were amazing. He made sure to teach concepts in the beginning of class if we have not been taught it yet. He would walk around and talk to every group to make sure they are on the correct path.									
The discussion assignments offered good practice. TA office hours were usually available and very helpful.									
He is very helpful when I do not understand topics.									
Akash was very good at making sure everyone was staying on the right track.									
When this class is taught again, what changes can the instructor make that will help improve support for student learning?									
More full-class help and explanations. Instruction directed towards small groups was very good.									
Nothing comes to mind									
I would suggest spending changing the grading. Very harsh and gives little partial credit.									
Maybe do some more problems on the projector so common misconceptions can be hammered out early on.									
What else would you like the instructor to know about your experience in this course?									
Awesome TA. H did a great job. His office hours were super helpful									
None									
I enjoyed my time in this course									
Akash was a very good TA and clearly wanted students to succeed and understand the material.

What aspects of the course were most useful for your learning?

Being able to work with others was helpful.

When this class is taught again, what changes can the instructor make that will help improve support for student learning?

I wont make it mandatory to work with others since for some people it may be more convenient to work alone.

What else would you like the instructor to know about your experience in this course?

It was a great class. Thank you for teaching the course.

Akash is very helpful and knowledgeable. Great TA!
